

would assist schools in preventing exposure to food allergens and assuring a prompt response when a child suffers a potentially fatal anaphylactic reaction.

Strict avoidance of the offending food is the only way to prevent an allergic reaction as there is no cure for food allergy. Fatalities from anaphylaxis often result from delayed administration of epinephrine. The importance of managing life-threatening food allergies in the school setting has been recognized by our own organization as well as the American Medical Association, the American Academy of Pediatrics, and the National Association of School Nurses.

The American Academy of Allergy, Asthma and Immunology applauds your efforts to address the need to assist schools with the policies and information needed to improve the management of children with food allergy and avoid life-threatening reactions. We are pleased to endorse your legislation.

Sincerely,

HUGH A. SAMPSON,
President.
